

Gourmani

6204078481 | gourmanivats01@gmail.com | LinkedIn | GitHub

Software Engineer with 1+ year experience at KPIT Technologies, focused on full-stack and backend development using MERN, Java, and Python. Exploring GenAI, LLM applications, RAG pipelines, and AI-powered automation.

EDUCATION

Siddaganga Institute of Technology

B.E in Electronics and Communication — CGPA: 7.45

Tumkur, Karnataka

Dec 2020 – June 2024

EXPERIENCE

KPIT Technologies

Associate Software Engineer

Pune, India

Sept 2024 – Oct 2025

- Performed CAN communication analysis and ECU diagnostics using Vector CANoe/CANalyzer in automotive software environments.
- Utilized CAN protocol concepts and Vector tools for communication debugging, simulation analysis, and system validation.
- Collaborated in Agile development teams to troubleshoot issues and contribute to production-level software deliverables.

APSYS Solution

Software Intern

Bangalore, India

Sept 2022 – Nov 2022

- Developed a smart home automation prototype integrating microcontrollers and wireless communication.
- Built mobile-based control logic enabling real-time device interaction.

PROJECTS

GrihSahayak / HomeBuddy — MERN Service Hiring Platform

Mar 2026 – Present

React.js, Node.js, Express.js, MongoDB, JWT, Firebase

- Built a scalable MERN-based household service hiring platform with role-based access control and interactive dashboards.
- Designed secure authentication workflows using JWT, Firebase OTP verification, and email-based account management.
- Integrated REST APIs and deployed production-ready frontend/backend services using Vercel, Render, and MongoDB Atlas.

JobVista – Tech Jobs Analytics Platform | *Python, SQL, NLP*

Jan 2026 – Feb 2026

- Developed an AI-driven job analytics platform to map candidate skills with market demand.
- Implemented NLP-based resume analysis for skill extraction and improvement suggestions.
- Built interactive dashboards and filtering features for job insights and analytics.

Trustworthy Image Data Using Deep Learning | *Python, Deep Learning*

Oct 2023 – May 2024

- Developed an image authenticity detection system using CNN and transfer learning techniques.
- Achieved **88% accuracy** using optimized model training.

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++, SQL

Frontend: React.js, JavaScript, HTML, CSS

Backend: Node.js, Express.js, REST APIs, JWT

Databases: MongoDB, MongoDB Atlas, MySQL

Tools & Platforms: Git, GitHub, Postman, Firebase, Vercel, Render, VS Code

Core CS: Data Structures and Algorithms, OOP, DBMS, System Design

Other: NLP, Machine Learning, LLM Applications, RAG Pipelines, Prompt Engineering

ACHIEVEMENTS

- Top 10 finalist in Tumkur Smart City Hackathon.
- Secured 2nd place in Technisium for Gesture-Controlled Music Player project.
- Completed CCNAv7: Introduction to Networks – Cisco Networking Academy.
- Solved 1000+ problems on LeetCode, GFG, and CodeChef.
